

Amidata Protect

ENTERPRISE LEVEL PROTECTION

WHAT IS AMIDATA PROTECT?

In a world where data growth is exploding, Amidata Protect makes it easy to back up your data.

Backups are performed using your existing data mover with an appliance installed into your DC. We manage data replication to our secure infrastructure, which is hosted across multiple tier IV data centres across Australia.

Protecting you from today's threats

WHY AMIDATA PROTECT?

Our offering gives you peace of mind. Regardless of how destructive a system attack is, your organisation's data is always protected. We use dual Ransomware protection technologies combined with data copies in many locations. Amidata is your safety net.

Fast

Amidata protect is fast. Fast to backup your data, fast to restore your data and fast to replicate offsite. Recalling times will be a thing of the past.

Secure

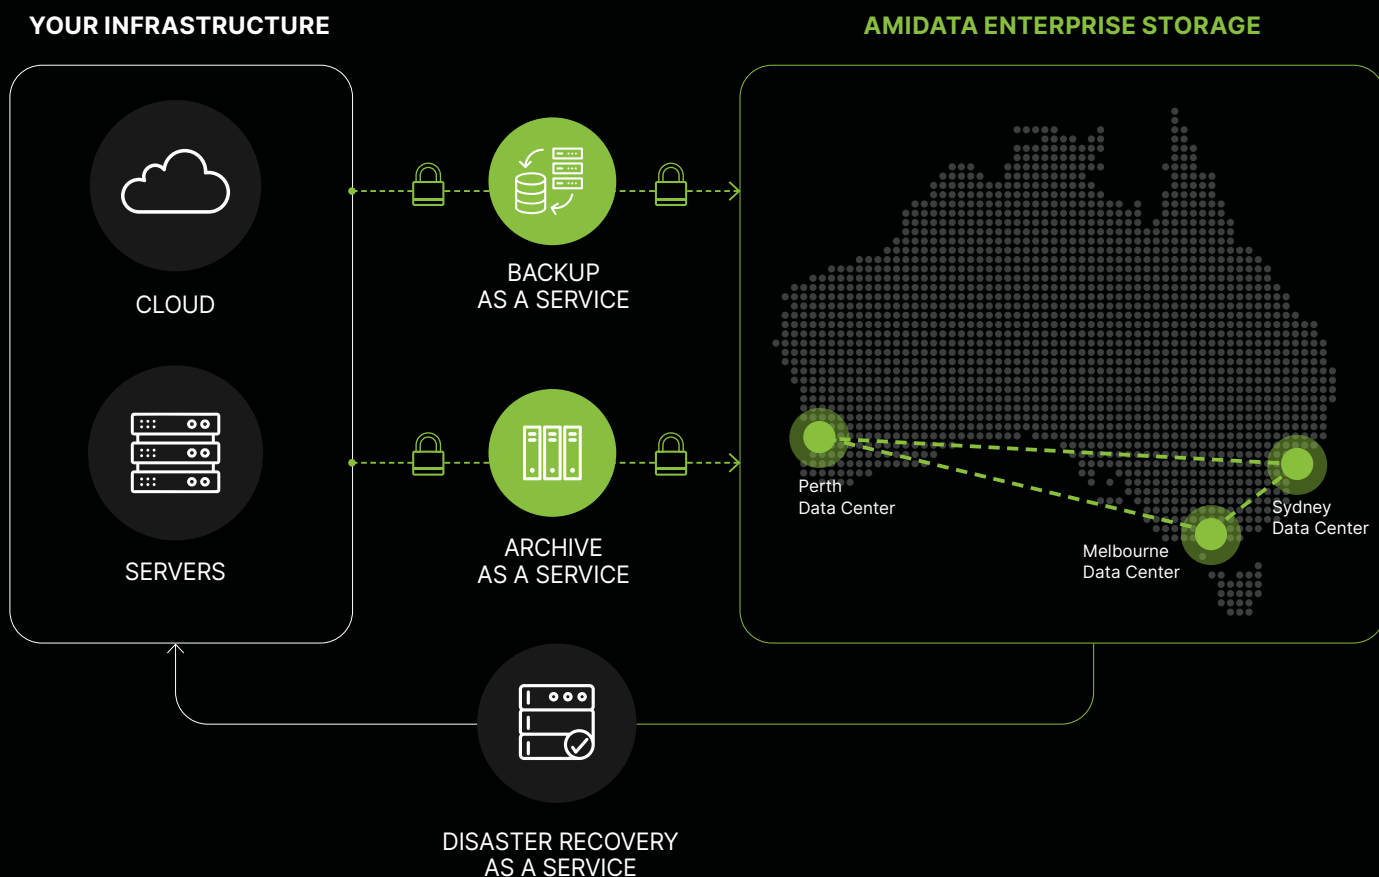

We encrypt data both at rest on the appliance and in flight during replication. Data sovereignty is simple: our infrastructure targets are located in tier IV data centres across Australia.

Easy to deploy

We can install the appliance in under a day and it won't disrupt your existing operating process.

BACKUP AS A SERVICE (BAAS)

OUR CLIENT BASE INCLUDES:

Here is what Robert P from Comsec had to say about the Amidata service and delivery.

"We have high security, high performance and high uptime demands for our critical infrastructure. We have leveraged Amidata's expertise to help design, deliver and deploy a mission critical solution to help meet ours and our customer's needs across Australia."

Protect your data, protect your reputation.
